

Video screen turned 'off'

Video screen turned 'on'

Digital Display Mirrors

Pilkington **MirroView™**

Giving a new look to digital displays and video screens, our transparent mirror products look like a normal mirror when the screen is 'off'. When the screen is 'on', the image shows through the mirror for a clear view of the screen beneath.

Pilkington **MirroView™** digital display mirror, for low light applications

Pilkington **MirroView™** is a highly reflective mirror coating with a clear substrate.

Pilkington **MirroView™** gives digital displays and video screens a modern, transitional look.

Pilkington **MirroView™** is ideal for concealing digital displays and video screens for commercial and residential applications.

When the screen is turned 'off' Pilkington **MirroView™** maintains a mirrored appearance, which conceals the screen. When the screen is turned 'on' the picture on the video screen shows through.

Pilkington **MirroView™** is very durable and can be easily handled, transported and processed, including tempering and laminating. Due to the durability of the pyrolytic coating, it does not degrade over time, which gives the product a virtually unlimited shelf-life.

Applications

- Living rooms
- Bathrooms
- Hotel rooms
- Retail shops
- Lobbies and salons
- Bars and restaurants
- Digital signage

Pyrolytic Coating Advantage

- Durable coating
- Easily handled and transported
- No edge deletion required
- Virtually unlimited shelf-life
- Inventoried locally
- Tempered and laminated
