

**FireLite**

## WITH ECO-ETCH

Fire-rated glass must adhere to building codes and tested size limitations, but that doesn't mean you have to compromise on aesthetics and design. Introducing FireLite Sateen, a unique and sleek pattern available on our FireLite NT or FireLite Plus fire-rated glazing.

Torstenson  
Glass

### **The etched pattern developed by our friends at Skyline**

Design with their proprietary Eco-Etch technique does not compromise the fire-rating or product performance. The Sateen pattern on FireLite maintains the required fire protection in a door, sidelite or borrowed lite, while enhancing the overall design quality of a space. Great for hospitals, offices, schools, and any space that requires fire-protective glazing with the added desire for improved aesthetics over regular FireLite.

Available in:

**FireLite<sup>®</sup> NT**

**FireLite<sup>®</sup> Plus**
